

DEEP AUTOMATION
SOFTWARE CODE IN SECONDS

Enterprise Applications. Delivered Faster.

www.deep-automation.de | scale@deep-automation.de

Product Overview

Deep Automation generates enterprise-ready applications in seconds transforming the way organizations build, deploy and scale software.

Key Benefits

- Go live in days, not months
- Bug-free, standardized and compliant code
- Fully customizable and extensible
- Lower development costs, faster ROI

Technology Stack

ReactJS, TypeScript, .NET Core, Entity Framework, Redis.

Use Cases

- Enterprise solutions
- SaaS platforms
- Multi-company / multi-branch applications
- Secure portals and dashboards
